

Occupational Health and Safety Management Policy

Implementing the requirements of the ISO 45001: 2018 Occupational Health and Safety Management System standard, and ensuring compliance with national and/or international legal requirements, we accept and undertake to continuously monitor the health and safety of our employees by considering them risk-based and to improve them by taking measures,

To organize training activities for creating and developing occupational health and safety awareness

To increase our productivity by taking the necessary precautions and adopting the goal of zero occupational accidents and zero occupational diseases,

To be a leading company in terms of occupational health and safety in the logistics sector by managing our occupational health and safety activities in an integrated manner with quality and environmental management systems.
